

# The Minimax (FS350 smart) 350mm capacity surfacer thickener that sets the standard

Proven over many years, the Classic range of surfacer thickeners from MiniMax are engineered to give you a clean, neat finish.

The Classic range gives you large straightening and machining capacities, without taking up a great deal of workshop real estate.

## Surfacing Fence

Extruded anodised aluminium fence 1100mm length. Tilts from 0 through to 45 degrees. The cast locking mechanism features two oversized handles, ensuring it locks in place securely on the table.

The 1900 mm table length gives you the ability to straighten oversized material

The electrowelded base and large cast iron worktables give this machine extreme rigidity – all equalling a smooth, trouble free cut. .

The feed system of helicoidal infeed roller and lightly knurled outfeed roller gives you positive, consistent feed through the cutterblock.

- 350mm cutterblock width
- 1900mm surfacing table length
- 230mm thickening depth
- 4hp, 400v, three phase motor
- Two feed speeds 7/14 m<sup>3</sup>/min
- Three standard knives
- Year make 2004
- Cast Iron Thickness table dimensions : 770 X 350 MM
- Trade in with good running condition
- Supplied as is.
- Used condition, scratches in paint as shown in photos.
- Works well considering it's age.
